Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A synergistic herbicidal mixture consisting essentially of

A) Imazamox, including its respective isomers as well as its respective environmentally compatible salts or esters or amides or other derivatives; and

B) at least one herbicidal compound selected from the group consisting of ~~chloro acetamides~~ metazachlor and a combination of metazachlor and quinmerac, and their respective isomers as well as their respective environmentally compatible salts or esters or amides or other derivatives

and, if desired,

C) at least one herbicidal compound selected from the group consisting of clomazone, atrazin, dichlormid, benoxacor, LAB-145138, MG-191, MON-13900, cyometrinil, oxabetrinil, fluxofenim, flurazole, naphtalicacidanhydride, fenchlorim, fenchlorazol, mefenpyr, cloquintocet (including its hydrate(s)), 1-ethyl-4-hydroxy-3-(1*H*-tetrazol-5-yl)-1*H*-quinolin-2-one, 4-carboxymethyl-chroman-4-carboxylic acid, *N*-(2-methoxy-benzoyl)-4-(3-methyl-ureido)-benzenesulfonamide, (3-oxo-isothiochroman-4-ylidenemethoxy)-acetic acid methyl ester, including

their respective isomers as well as their respective environmentally compatible salts or esters or amides or other derivatives,

wherein the mixture has a synergistic herbicidal effect.

2. (Cancelled)

3. (Cancelled)

4. (Currently Amended) A synergistic herbicidal mixture as claimed in claim 1 ~~3 in which~~ wherein ~~the chloro acetamide~~ component B) is metazachlor, including its respective isomers as well as its respective environmentally compatible salts or esters or amides or other derivatives.

5. (Previously Presented) A herbicidal composition comprising a herbicidally active amount of a synergistic herbicidal mixture as claimed in claim 1, at least one inert liquid and/or solid carrier and, if desired, at least one further additive.

6. (Previously Presented) A method of controlling undesired vegetation, which comprises applying a synergistic herbicidal mixture as claimed in claim 1 before, during and/or after the emergence of undesired plants simultaneously or in succession.

7. (Previously Presented) A method as claimed in claim 6, wherein the undesired vegetation is proximate crops.

8. (Previously Presented) A method as claimed in claim 7, wherein the crops are tolerant or resistant against the synergistic herbicidal mixture.

9. (Previously Presented) A method as claimed in claim 7, wherein the crop is brassica napus.

10. (Previously Presented) A method of controlling undesired vegetation in ALS-herbicide resistant or tolerant brassica napus, which comprises applying simultaneously or in succession, at least proximate the brassica napus a synergistic herbicidal effective amount of a mixture as claimed in claim 1.

11. (Cancelled)

12. (Currently Amended) The method of claim ~~11~~ 10, wherein ~~the chloro acetamide~~ component B) is metazachlor.

13. (Previously Presented) The method of claim 10, wherein the component C) is selected from the group consisting of clomazone, atrazin and the safener cloquintocet, including esters and hydrates thereof.

14. (Previously Presented) The method of claim 10, wherein the application rate of the active ingredients is 5 to 2500 g/ha.

15. (Previously Presented) The method of claim 10, wherein the compounds which are applied are Imazamox together with at least one further compound selected from the group consisting of

a) Metazachlor

~~b) Metolachlor~~

~~c) Dimethenamid~~

~~d)~~ b) Metazachlor and clomazone

~~e)~~ c) Metolachlor and atrazin.

16. (Previously Presented) A synergistic herbicdal mixture consisting essentially of:

imazamox, and

a mixture of metazachlor and quinmerac.

17. (Previously Presented) A method of controlling undesired vegetation, which comprises applying a synergistic herbicidal mixture as claimed in claim 16 before, during and/or after the emergence of undesired plants simultaneously or in succession.

18. (Currently Amended) A method of controlling undesired vegetation in ALS-herbicide resistant or tolerant ~~brassical~~ brassica napus, which comprises applying simultaneoulsy or in succession, at least proximate the brassica napus a synergistic herbicidal mixture as claimed in claim 16.

19. (New) A synergistic herbicdal mixture consisting essentially of:

imazamox, and

a mixture of metazachlor and quinmerac.

20. (New) A method of controlling undesired vegetation, which comprises applying a synergistic herbicidal mixture as claimed in claim 19 before, during and/or after the emergence of undesired plants simultaneously or in succession.

21. (New) A method of controlling undesired vegetation in ALS-herbicide resistant or tolerant brassica napus, which comprises applying simultaneoulsy or in succession, at least proximate the brassica napus a synergistic herbicidal mixture as claimed in claim 19.
